Description	
Subtasks:	
Task # 11861: get an ungleich k8s cluster or create an own, for example using k3s Closed	

History

#1 - 07/07/2023 06:44 PM - Peter Schwindt

- Subject changed from [grab me] Setup lemmmy in k8s to Setup lemmmy in k8s
- Assignee set to Peter Schwindt

#2 - 07/07/2023 06:47 PM - Peter Schwindt

maybe helpful:

- <https://codeberg.org/jlh/lemmy-k8s> -- NOPE, isn't, incomplete, just tells to install requirements but the software itself
- <https://github.com/gogo199432/Lemmy-K8S>

#3 - 07/07/2023 06:56 PM - Peter Schwindt

- Status changed from New to Seen
- Estimated time set to 40.00 h

#4 - 07/07/2023 06:56 PM - Peter Schwindt

- Subtask #11861 added

#5 - 07/07/2023 08:13 PM - Peter Schwindt

- Status changed from Seen to In Progress

#6 - 07/08/2023 07:43 AM - Peter Schwindt

Tried to go the way to first set it up using docker-compose, but there seems to be an issue with not having rustfmt and / or a too old version of rust (?) installed:

```
167.1 error: failed to run custom build command for `lemmy_utils v0.18.0 (/app/crates/utils)`
167.1
167.1 Caused by:
167.1   process didn
't exit successfully: `/app/target/debug/build/lemmy_utils-87c80cd323807c89/build-script-build` (exit status:
1)
167.1   --- stderr
167.1   Error: FileRead { file: "translations/email/en.json", source: Os { code: 2, kind: NotFound, message: "
No such file or directory" } }
167.1 warning: build failed, waiting for other jobs to finish...
```

(even when moving one release back...)
