Description			

History

#1 - 07/07/2023 06:57 PM - Peter Schwindt

- Subject changed from get a k8s cluster or create own, for examples using k3s to get an ungleich k8s cluster or create an own, for example using k3s

#2 - 07/07/2023 06:58 PM - Peter Schwindt

- Status changed from New to Seen

#3 - 07/07/2023 06:58 PM - Peter Schwindt

- Assignee set to Peter Schwindt

#4 - 07/07/2023 06:59 PM - Peter Schwindt

In order to (try to) install lemmu on k8s, well, we need a k8s cluster before.

#5 - 07/07/2023 08:12 PM - Peter Schwindt

- Status changed from Seen to Resolved

Took the shortcut route and create a 1-node k8s cluster at DigitalOcean. Also added a personal TODO task to not forget tearing it down on Wednesday.

Learned / TIL: There's doctl (<https://github.com/digitalocean/doctl>) to use the DO API from the CLI.

#6 - 07/07/2023 08:13 PM - Peter Schwindt

- % Done changed from 0 to 100

- Estimated time set to 0.50 h

#7 - 01/02/2024 12:37 PM - Nico Schottelius

- Status changed from Resolved to Closed
