There's a community-backed APT repository [1] allowing easy deployment on debian and derivatives, which I will quickly cdistify for a test deployment at ungleich.

Initial type (__ungleich_matomo) push to dot-cdist and deployed on analytics.ungleich.ch. I'll tune it (auto-archiving, LDAP authentication) and enable tracking for ungleich.ch tomorrow.

<https://analytics.ungleich.ch/> is plugged to the LDAP for Nico & Sanghee, and is tracking ungleich.ch/u/.

The deployment is not perfect/optimized, but good enough for now. It'll gather data over the next few hours/days.
