- install etcd & start etcd
- read about how to use comands
- commands failed with different errors
- searching error file / no error file founded
- give right permissions - error still there

Questions:

- how looks a structure for this kind of Database?

- retry - make etcd runnable
-- tutorial is good ended badly - SystemD!!!
-- need a Init File for Etcd
-- found a Init File-> more errors occurs - interessting, its shows the deeper paths
-- maybe etcd will not work proper today, but i learned much about InitV.
