History

#1 - 06/07/2019 01:01 PM - Roland Zweifel

Things i did to understand flask:

- found out how to install and wrote progress to Chaorite
- learned structure with a web page, progress to chaorite
- wrong way, no input/output to html - > input/output by CLI (curl). going back to start again
-
- learned how to interact with CLI to Flask by GET/POST with input form
- learned ho to send msg by curl
- learned how to interact with CLI to Flask by GET/POST with request methode
- learned how to send a integer by curl
- wrong way, input/output must be in use of JSON
- learned how to use JSON for Inputs
- learned how to send JSON Frame by curl

- Input & Output with JSON works!
- GIT ADD / COMMIT / STATUS / PUSH

#2 - 06/07/2019 01:25 PM - Nico Schottelius

Good work, more updates like this, please!

Things i did today:

- Raw Flask Structure is ready
- JSON Commands are planned
- Server can take command and give out a specified variable
- and: Git Push is done

#4 - 06/10/2019 12:38 PM - Roland Zweifel

- programming first challenge
- programmed striping network-string (check if the syntax is ok)
- programmen switch (to select later the challenges)
- stopped at a error - could it be that Flask has rulez where to write your code?

- cooked and going back to work
- is the error about the "if *name* == '__main__': app.run(debug=True)" ??
- OK OK Python doesnt have the switch case statement, lets do something else... man! what a world!
- rewrite first part of the code
- find a solutione for the next one (switch would be perfect for that...)

- Challenge 1 is running!
- Ok i have to to some other things but core is running
- store it in a DB
- and then dont forget to do the login, that will also stored in a DB
- make it pretty! remove useless comments or #, make it pretty an keep the idea for other Challenges.

#5 - 06/10/2019 12:46 PM - Nico Schottelius

Hey Roli,

please ensure that your code is always pushed to code.ungleich.ch

#6 - 06/11/2019 01:15 PM - Roland Zweifel

- installed mysql and a client to verify the connection
- solved connection trouble with mysql successfully
- saved progress and realized, that i should use PostGreSQL and/or etcd

#7 - 06/25/2019 10:34 PM - Nico Schottelius

- Assignee deleted (Nico Schottelius)

#8 - 11/06/2019 11:53 AM - Nico Schottelius

- Status changed from New to Rejected
- Parent task deleted (#6679)

will create another task for this later
