Current state I know of:

- there is etcd{1,2,3}.ungleich.ch
- They have an unknown configuration
- And they have the ROOT key of the certificate deployed

Expected results are:

- etcd fully setup and redoable via cdist
- an easy way to maintain and add new applications

#5 - 05/24/2020 11:08 AM - ll nu

- Priority changed from Urgent to Low

Afaik it's not urgent anymore.

If it is let me know.

#6 - 05/24/2020 11:36 AM - Nico Schottelius
