Target version:			
PM Check date:			
Description			
Steps to reproduce:			
<ol style="list-style-type: none">1. Choose a VM to buy at staging/dev servers for https://datacenterlight.ch2. Register as a user and input card details in the "Make payment page". Ensure that the card leads to a payment related error.3. Add a valid SSH key in the next page4. In the order confirmation page, press "Place Order"5. Order fails and user is redirected to "Make payment page"6. Retry steps 2 and 3, and input the same key that was input in step 3			
Observed behavior: Form submission fails with "A public key with the name ... exists"			
Expected behavior: Form submission succeeds

- Status changed from In Progress to Feedback
- Assignee changed from Mondri Ravi to Sanghee Kim

I proposed a fix for this issue in the merge request https://code.ungleich.ch/ungleich-public/dynamicweb/merge_requests/712

Basically, we had a check to not allow the user to input the same key again. I just removed this code.

The code is deployed to <https://dev2.datacenterlight.ch> for testing.

To test:

1. Try to buy a VM with a known SSH Key and the card 4000 0000 0000 0341 -> Payment fails and we return to the make payment page
2. Input a good credit card 4111 1111 1111 1111
3. Input the same SSH key as 1
4. Previously, the system would complain about the card already exists (on staging for eg). Now, it accepts the card and the payment is successful.

#3 - 08/26/2019 01:11 PM - Sanghee Kim

While testing, the step 1 goes to 404 error page after card submit, is this as expected? I think the error should be handled differently.

#4 - 08/26/2019 01:18 PM - Sanghee Kim

I tested with the key I created and saved via generate key, and above flow works as expected.

#5 - 08/27/2019 04:02 PM - Mondri Ravi

Sanghee and I faced a weird issue yesterday, while trying out the test steps via hosting flow.

The second attempt (with a correct credit card) also failed.

However, when I tested it today; after clearing cache and logging myself out and relogging in, the flow works as intended (payment via the second

and correct card succeeds). So, I wonder if this could be cache related issue.

#6 - 08/28/2019 07:16 PM - Mondri Ravi

- *Status changed from Feedback to Closed*

- *Assignee changed from Sanghee Kim to Mondri Ravi*

This was merged in 2.6.3 and deployed to production today.
