

Open Infrastructure - Task #7083

Survey Django App Installation and Test

08/26/2019 08:04 AM - Ahmed Bilal

Status: Closed	Start date: 08/26/2019
Priority: Normal	Due date: 09/18/2019
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
PM Check date:	
Description Distro: Debian or Devuan	
Tests <ul style="list-style-type: none">• Find out whether we can connect it easily to our ldap<ul style="list-style-type: none">◦ answer is "probably yes" - ping Mondy about it• Find out how to manage the following flow:<ul style="list-style-type: none">◦ A person without an account on LDAP wants to participate - what to do?• Resemble last time's Hack4Glarus form<ul style="list-style-type: none">◦ ping Sanghee for it	
Should be released by 18th of September	

History

#1 - 08/26/2019 08:12 AM - Ahmed Bilal

Setup <https://djangopackages.org/packages/p/django-survey-and-report/> as follows:

- Create a new ipv6 only VM
- Configure it using cdist (ping [Jin-Guk Kwon](#) and [llnu](#) if you need help)
- Configure our IPv6-IPv4 proxy to proxy IPv4 requests to it

#2 - 08/26/2019 08:39 AM - Nico Schottelius

- Project changed from *hack4glarus-2019-winter* to *Open Infrastructure*

Corrected the project -> use Open Infrastructure whenever we don't have internal details that cannot be publicly shared

#3 - 08/26/2019 12:27 PM - Ahmed Bilal

- Project changed from *Open Infrastructure* to *hack4glarus-2019-winter*

We have or we don't have?

OK.

#4 - 08/26/2019 01:32 PM - Ahmed Bilal

- Project changed from *hack4glarus-2019-winter* to *Open Infrastructure*

#5 - 09/02/2019 09:40 AM - Ahmed Bilal

It can be found at <http://survey.hack4glarus.ungleich.cloud/>

#6 - 09/10/2019 05:41 PM - Nico Schottelius

- Due date set to 09/18/2019

- Description updated

- Subject changed from Survey Django App Installation v1 to Survey Django App Installation and Test

#7 - 09/10/2019 05:42 PM - Nico Schottelius

... not to mention: for production:

- setup with cdist
- letsencrypt
- backup

("the usual stuff")

#8 - 09/11/2019 09:42 AM - Ahmed Bilal

What do you mean by backup?

#9 - 09/11/2019 06:52 PM - Nico Schottelius

backup -> backing up essential data to our backup VM

redmine@ungleich.ch writes:

#10 - 09/17/2019 09:18 PM - Ahmed Bilal

Can't backup to place5 as it is full.

#11 - 09/19/2019 08:12 AM - Nico Schottelius

You can put the ticket to waiting OR assign it to ll nu with status "Feedback" that you need feedback when backup is usable again

redmine@ungleich.ch writes:

- Assignee changed from Ahmed Bilal to ll nu

Please ping me when backup5 is usable again. Thanks

#13 - 09/28/2019 07:23 PM - Ahmed Bilal

- % Done changed from 70 to 0

- Assignee changed from ll nu to Nico Schottelius

backup5 is still not resized. But, I created a cron job to do local backup every hour + there would be remote backup @server6 (Don't sure about the frequency, I think it is once a day at 03:00) as server5 is full. LDAP is not connected as we agreed to ask user for his/her email and I think it is a good trade off because for non-ungleich people it may be little offsetting to create an account to fill a survey. The survey application is deployed at survey.hack4glarus.ungleich.ch.

#14 - 09/28/2019 07:24 PM - Ahmed Bilal

- Status changed from In Progress to Feedback

#15 - 10/14/2019 02:20 PM - Ahmed Bilal

- Assignee deleted (Nico Schottelius)

- Status changed from Feedback to Closed

Backup to place6.
