

Open Infrastructure - Task #7172

Setup new VM/service: search.ungleich.ch

09/24/2019 03:36 PM - Nico Schottelius

Status: Closed	Start date: 09/24/2019
Priority: Normal	Due date: 10/04/2019
Assignee: Ahmed Bilal	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
PM Check date:	

Description

- use yaci.net
- Do full setup using cdist
- Use IPv6 only alpine VM
- Setup https server

Yaci installation

- either build a package for alpine (preferred)
- or use cdist to download archive, extract
 - plus openrc or monit for starting it
- Should run as user app
- Proxy / letsencrypt via nginx as usual

Laptop installation

What I did on my notebook for <http://nico.ungleich.cloud:8090/>:

- download the archive, extract
- cd yaci && startYACY.sh

History

yacy?

#2 - 09/24/2019 06:57 PM - Nico Schottelius

genau!
(yes)

I tried creating alpine package but it is little difficult because the YaCy is written in Java which is a little mess. For the time being I would create a cdist type and will later make alpine package.

https://wiki.yacy.net/index.php/En:Debian_High_Availability (Setup nginx + Create init.rc script)

#8 - 10/30/2019 05:53 AM - Ahmed Bilal

- File *yacy.png* added

For what purpose, do we need yacy at search.ungleich.ch? (<https://redmine.ungleich.ch/issues/7172>).

password: goanaiG5caijeiliko9fi5Uyohreith

It offers three use cases.

- Community based web search
- Search portal for your own webpages
- Intranet Indexing

ping for sanghee

#11 - 10/30/2019 12:08 PM - Nico Schottelius

The idea is to have all our sites indexed by search.ungleich.ch and that if someone wants to search on any of our pages, we will use the search form of our yaci to provide the results.

- Status changed from *Seen* to *Resolved*

Verified and finished search.ungleich.ch so it's production ready.
cdist types are created, manifest is updated.

#14 - 12/04/2019 10:05 AM - Ahmed Bilal
