Open Infrastructure - Task #7247

Our switches in place8 should be moved to a different location / rack

10/21/2019 06:16 PM - Nico Schottelius

Status:	Closed		**Start date:**	10/21/2019
Priority:	Normal		**Due date:**	10/30/2019
Assignee:	Nico Schottelius		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
PM Check date:				

Description

- Coordinate with Kilian Bäbler
- Visit place8 once before doing the actual move
    - Checkout the UPS situation
    - Verify that both switches are connected to the UPS
    - Verify that the UPS can hold power for both switches

Step

- First verify that the switches are both configured the same
- First move the unused switch / the one that does not bridge the two data centers
- Then move the cables to the moved switch (-> short interrupt between the data centers)
    - Have 1 or 2 notebooks open, testing the connection
    - Verify that connection is back when plugging back in
- Then move the second switch (which is now the backup switch

Should be finished by mid next week.

History
