Category:			**Estimated time:**	0.00 hour
Target version:				
PM Check date:				

Description
Merge the different ucloud components into one repository and create a ucloud script that can be called like ucloud api

History

#1 - 10/23/2019 08:23 AM - Ahmed Bilal

- *Project changed from 3 to Open Infrastructure*

#2 - 10/23/2019 08:23 AM - Ahmed Bilal

- *Status changed from New to In Progress*

#3 - 10/25/2019 12:50 PM - Ahmed Bilal

- *Status changed from In Progress to Seen*

- *Assignee changed from Ahmed Bilal to Nico Schottelius*

- *Priority changed from High to Normal*

ucloud-{api,scheduler,host,filescanner,imagescanner,metadata} merged into single repo called ucloud. It can be found at
https://code.ungleich.ch/ucloud/ucloud.

I haven't merged ucloud-pay into it as it needs some work to integrate with uotp and ucloud in general.

Waiting for go ahead signal.
