

Open Infrastructure - Task #7278

Task # 6869 (In Progress): Challenge OpenStack and OpenNebula with ucloud

Define how networking works in ucloud

10/30/2019 07:13 PM - Nico Schottelius

Status: In Progress	Start date: 10/30/2019
Priority: Normal	Due date:
Assignee: Nico Schottelius	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
PM Check date:	
Description Objective: this ticket defines the details	
Assumptions <ul style="list-style-type: none">• we want to support empty L2 networks• We realise L2 networks with vxlan (based on IPv6 underlay), however we should basically abstract this away<ul style="list-style-type: none">◦ i.e. there could potentially also be a vlan type or IPv6 SR based	
Default network To make life easier for people who don't care TBD	
Networking model 1: vxlan + radvd	
Networking model 2: L2 only	

History

#1 - 10/31/2019 09:19 AM - Ahmed Bilal

Currently, I setup ucloud with bridged networking (radvd + rdnsd).
