Open Infrastructure - Task #7427

Rough draft to support console on our VMs

12/06/2019 12:44 AM - Nico Schottelius

Status:	Rejected		**Start date:**	12/06/2019
Priority:	Normal		**Due date:**	12/20/2019
Assignee:	Jin-Guk Kwon		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
PM Check date:				

Description

- Migrate dynamicweb user base to ldap
    - write script to migrate users (passwords? do we have to reset / have them set it up again?)
        - maybe implement "soft reset": change user to ldap after they successfully logged in
- Connect guacamole to ldap
    - easy job -> Jin-Guk
- Once per minute sync the VM location (server+vnc port) in the guacamole DB
    - also cleanup old entries!
    - map users / connections based on ... username or email?
- Open the firewall to allow guacamole to access VNC ports of qemu

Let's try to make this a pre christmas present to our users.

- Ahmed, you are in the lead for django
- Jin-GUk, you are in the lead for guacamole
- Balazs, you are in the lead for the firewall

History

#1 - 12/24/2019 07:15 PM - Ahmed Bilal

- Status changed from New to Closed

Django part done. LDAP account is created as soon as user login to datacenterlight.

#2 - 12/25/2019 05:55 PM - Ahmed Bilal

- Status changed from Closed to In Progress

#3 - 01/13/2020 03:13 AM - Ahmed Bilal

- Assignee changed from Ahmed Bilal to Jin-Guk Kwon

#4 - 01/02/2024 02:06 PM - Nico Schottelius

- Status changed from In Progress to Rejected
