Open Infrastructure - Task #7503

Create script to create new / updated OpenBSD image for OpenNebula

12/19/2019 09:58 AM - Nico Schottelius

Status:	Rejected		**Start date:**	12/19/2019
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
PM Check date:				

Description

- Upgrading to 6.6
- The original image was made by [@Reyk Floeter](#)
- The logic is basically the same as the other images, however there is no deb/rpm
  - Reyk installed / modified "cloud-agent" - this is what we want to install
- Username is "puffy" instead of root
  - And afair there might be a "doas" (==sudo) password IN the ~/.ssh/authorized_keys file
- Script should go into ungleich-tools, too
- Expected to work only under OpenBSD

Note by @kirill on chat.ungleich.ch // datacenterlight:

regarding Task [#7503](#) - remember to add family inet6 inet4 to /etc/resolv.conf.tail

[@Timothée Floure](#) line above is for you, I suppose
