Description			
<ul style="list-style-type: none">• Convince Nico that it works ;-)• On Alpine and Arch			

History

#1 - 12/21/2019 12:25 PM - Nico Schottelius

arch

- etcd3 error message might be improve / error out on import error
 - fail only when it is required for operations!
- don't error out if ucloud.conf is missing
- don't give traceback if keys are missing
 - What is the user expected to do?
- python setup.py install
 - flask error -> wrong caps!
- permission error for vogfile
 - PermissionError: [Errno 13] Permission denied: '/var/log/ucloud.log'

```
pip install etcd3
mkdir /etc/ucloud
touch /etc/ucloud/ucloud.conf
```

```
python setup.py install
```

#2 - 01/13/2020 03:14 AM - Ahmed Bilal

- Status changed from In Progress to Closed

The above mentioned things were fixed.
