Description			
It is required as nico said that there would be multiple file hosts and not necessarily all files are available on some particular host. https://chat.ungleich.ch/ungleich/pl/3pf77f1ui7yiupxjyqayzf67ry

We should have a "created_at" and "deleted_at" for every object.

For the example above: the host would probably often more something like "files1.datacenterlight.ch" or "username.datacenterlight.ch" or so.
